

Direction of Care Solution

Preferred pharmacy network to lower drug spend and promote patient safety

Five states currently have regulations that allow pharmacy Direction of Care: California, Connecticut, New York, Minnesota and South Carolina. Managing these varied regulations can be a complex process for payers in their attempt to drive more pharmacy scripts in network.

The MyMatrixx by Evernorth® **Direction of Care Solution** simplifies this process by offering a **national, preferred pharmacy DOC network** designed to lower client drug spend and promote patient safety by guiding patients to a curated network of trusted pharmacies.

Direction of Care (DOC) refers to workers' compensation regulations that allow a payer to choose the pharmacy network or providers the injured worker must use.

The MyMatrixx DOC Solution:

INCREASES

- + Client Savings
- + Patient Safety
- + Network Compliance
- + Point-of-Sale Transactions

DECREASES

- + Paper Bills
- + Bill Review Costs
- + Prior Authorizations
- + Out-of-Network Challenges

The MyMatrixx DOC Solution delivers:

Network optimization for safety & savings

- + Directs patients to a national network of trusted pharmacies
- + Excludes out-of-network (OON) providers, third-party billers, and flagged pharmacies

Flexible eligibility management

- + Allows the client to include or exclude DOC participation at multiple levels
- + Integrates with our portal, MyPassport®, for real-time status and communication visibility

Strengthened compliance

- + Rejects prescriptions from non-DOC pharmacies and delivers a clear message to pharmacies through managed communications and EOBs
- + Ensures strict adherence with no override allowed

Automated communication & transparency

- + Meets state-specific requirements
- + Includes communications to keep patients, prescribers, pharmacies and billers informed

The MyMatrixx
DOC Solution
saves clients
on average

\$70
